Panerai designs innovative instruments empowering Modern Heroes.

Founded in Florence in 1860 as a workshop, shop and subsequently school of watchmaking, for many decades Panerai supplied the Italian Navy and its specialist diving corps in particular with precision instruments. Today Panerai develops and crafts its movements and watches at its Neuchâtel manufacture. The latter are a seamless melding of Italian design flair and history with Swiss horological expertise.

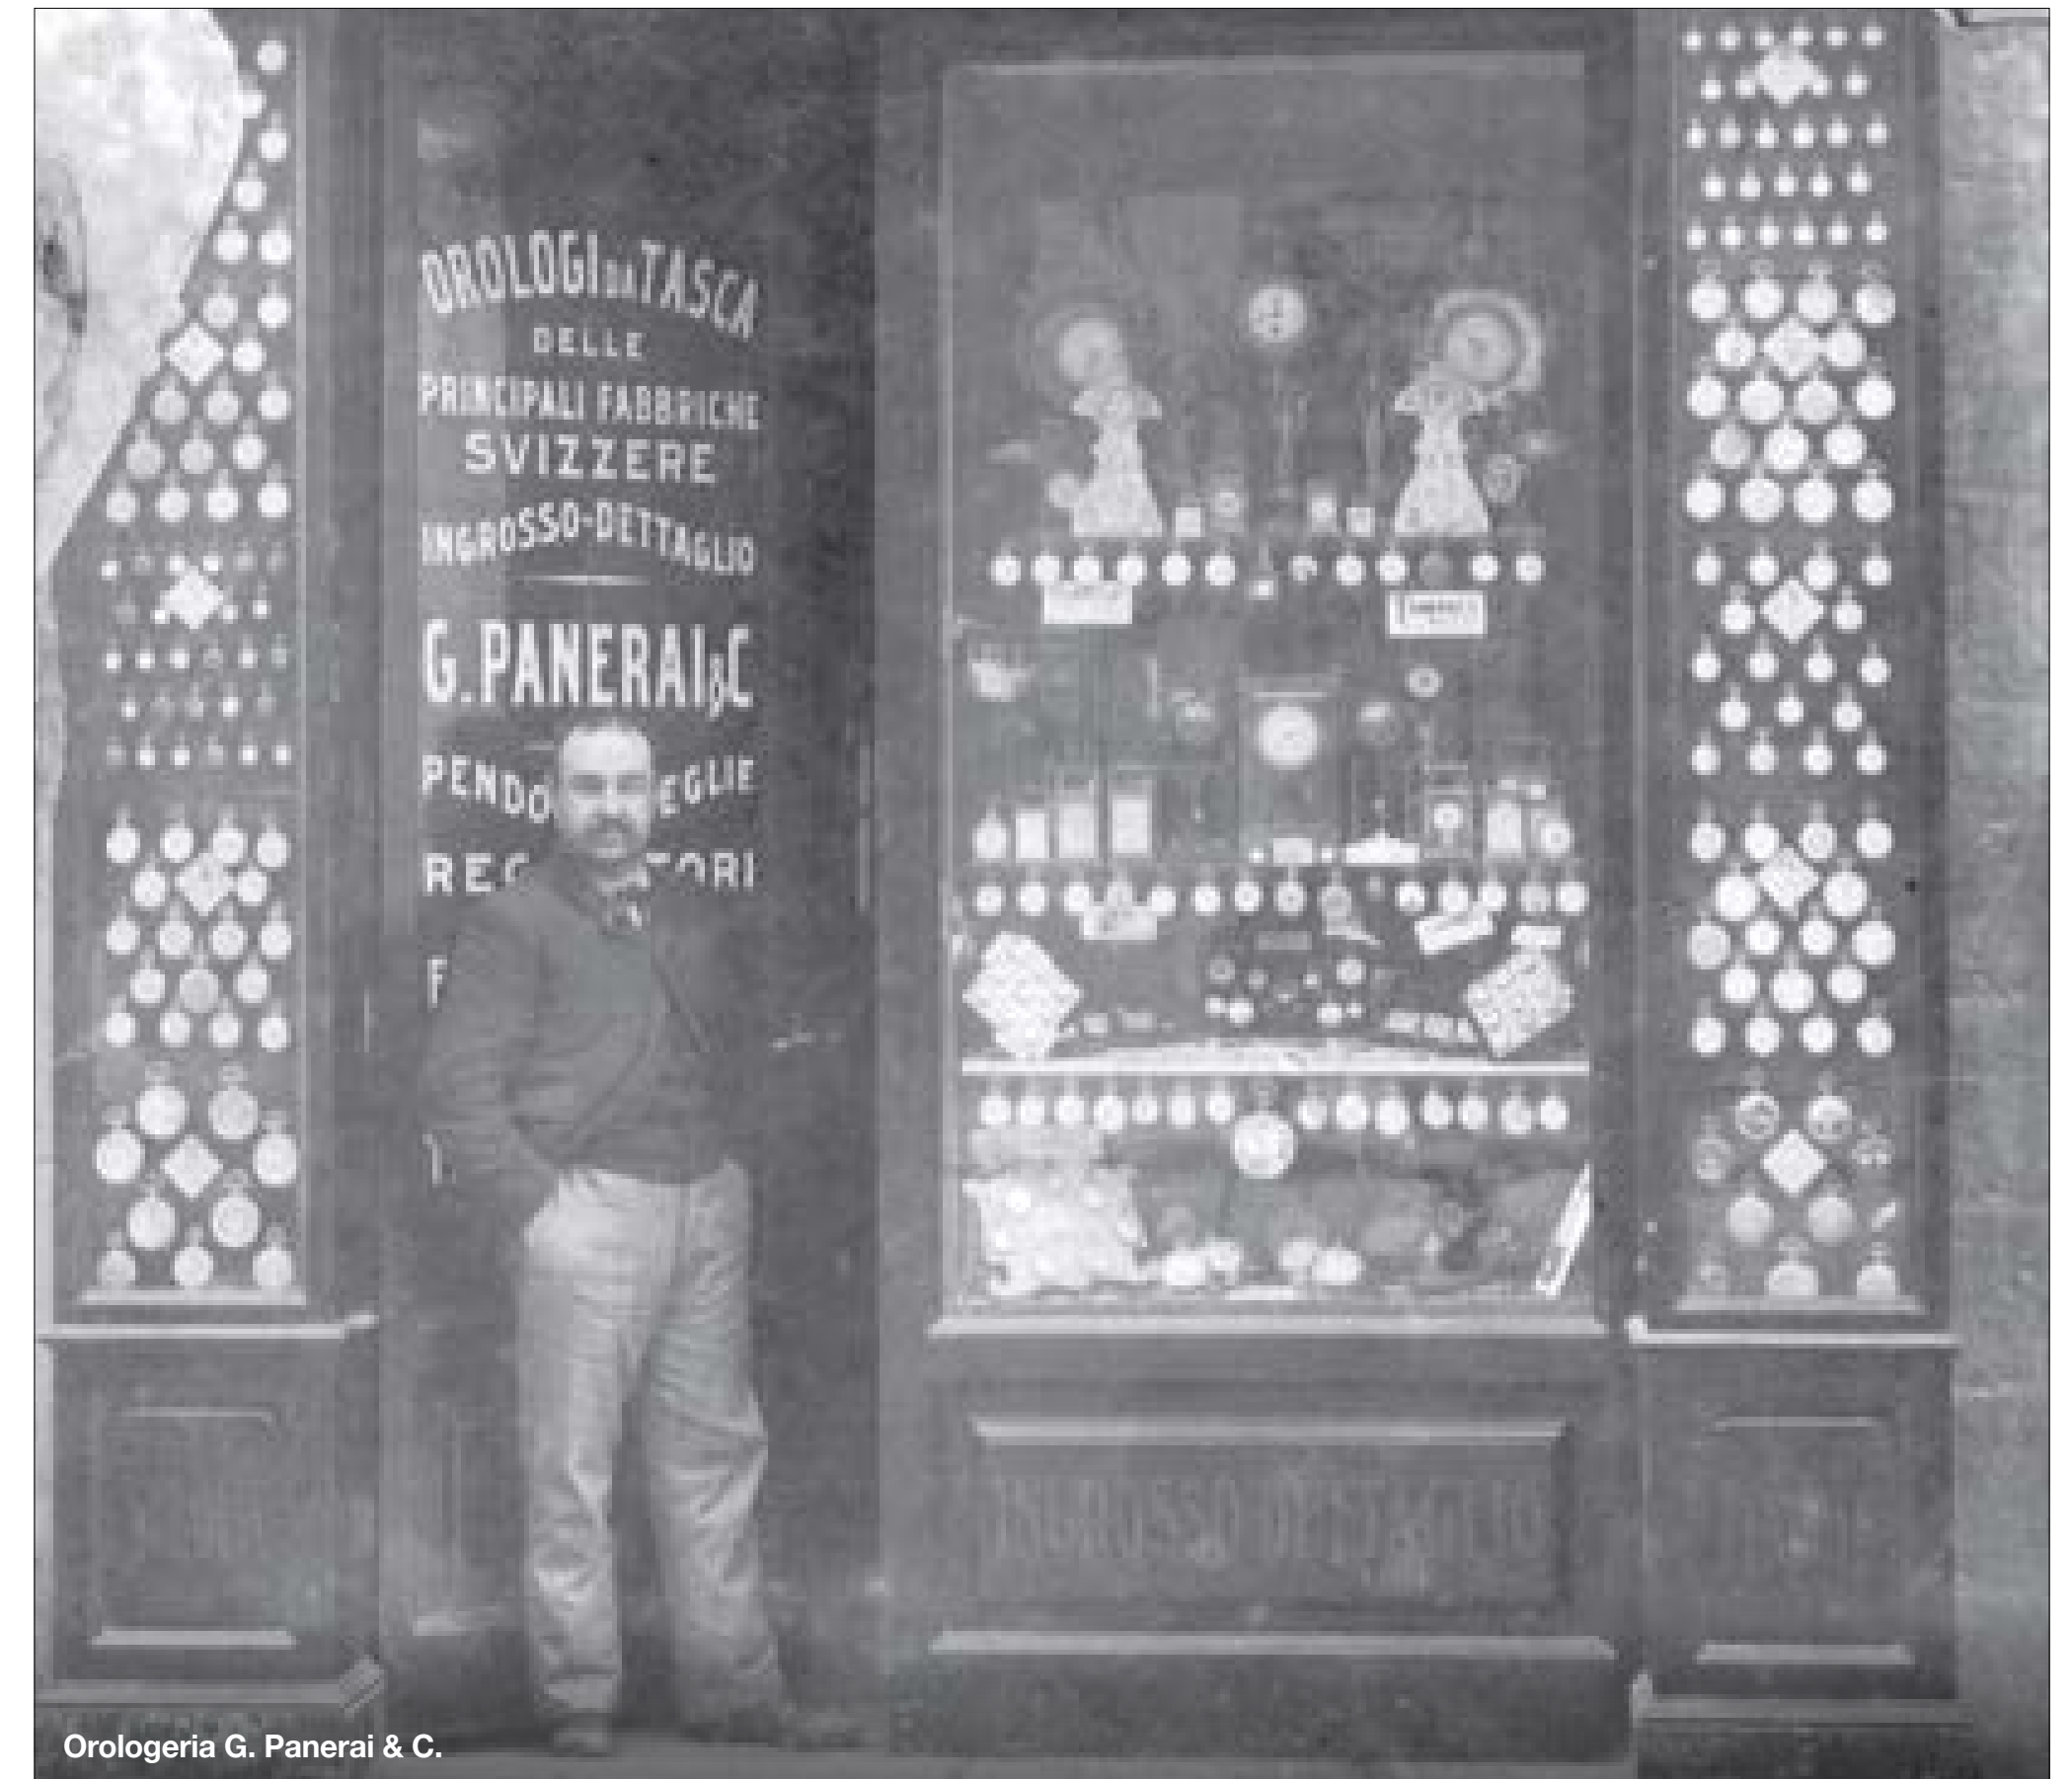

Our History

Giovanni Panerai opens his watchmaker's shop on Ponte alle Grazie in Florence: serving not only as a shop and workshop but also as the city's first watchmaking school, Officine Panerai's history begins here.

The Panerai Manufacture

The Panerai Manufacture, opened in 2002 and nestled in the historic city of Neuchâtel, Switzerland, is the engine driving the technological innovation and horological craftsmanship of the Maison.

Technical design and construction of prototypes, manufacture of movement components and their subsequent assembly, adjustment of movements and watches, final retouching operations on the components and the cases: all in one place.

OFFICINE PANERAI

Go Beyond the watch and discover how Panarai's journey, rooted in Florence's cultural and artistic heritage, evolved into a story of innovation, precision, and enduring legacy.

A composite image featuring a Panerai Radiomir watch, a close-up of its crown-protecting device, and a disassembled watch movement. The top left shows the watch with its black dial, white Arabic numerals, and a brown leather strap, resting on a book with Italian text. The top right is a close-up of the crown-protecting device, showing the crown and the protective lever. The bottom right shows the disassembled watch movement, with various components laid out on a black background.

Luminor Collection

Luminor
Innovation from the Depths

Born from the sea, Luminor is the emblem of the brand and a symbol of Italian design. Luminor is the collection characterized by the emblematic safety lock system. Core business of the Brand with a wide assortment developed by functions and materials.

Luminor Collection

The legacy of Luminor has evolved into what it is today: a definitive symbol of Panerai, a pillar of the brand's legacy, and an enduring icon of functional design. Its distinctive features were born from necessity, created to meet the demands of the Italian Navy in the mid-20th century, where reliability and precision were paramount in extreme conditions.

The patented crown-protecting device, a hallmark of Panerai, was designed to ensure exceptional water resistance and safeguard the movement from shocks and unintentional adjustments during underwater missions. The sandwich dial construction and luminous markers were developed to provide optimal legibility in low-light and underwater environments, which is critical for military divers relying on precision timing.

Even the robust case design, with integrated lugs, was engineered to withstand the pressures of the deep sea while maintaining unparalleled durability.

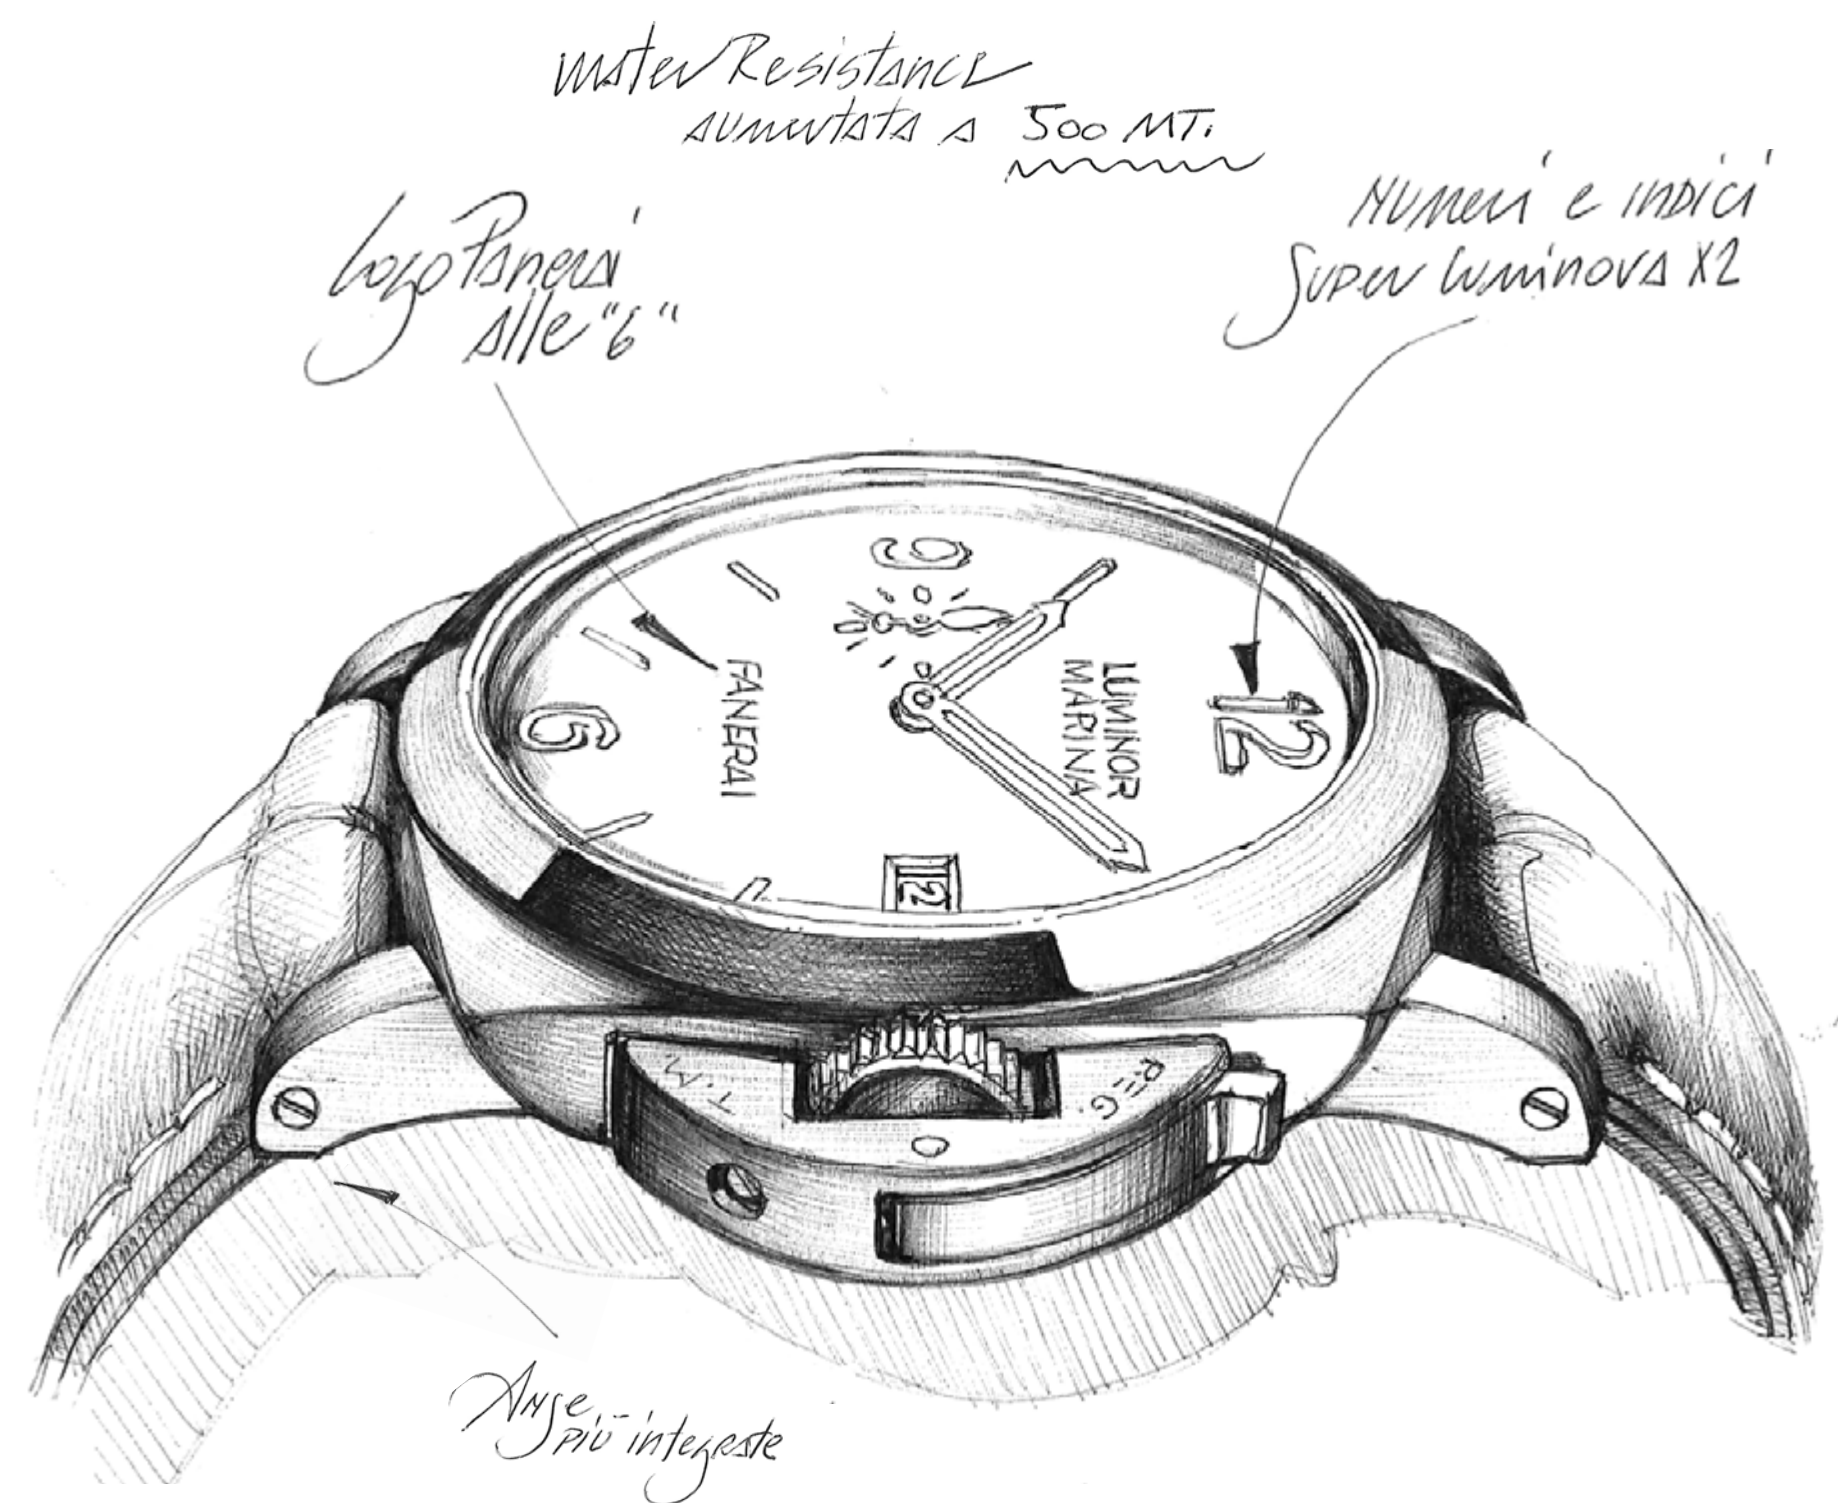

Today, these features are design elements synonymous with Panerai's DNA. Made from advanced materials like stainless steel, titanium, and bronze, the Luminor has evolved into a modern emblem, where its tool-watch origins meet everyday functionality and style.

The evolution of the icon

Since 1960 Luminor Marina was introduced, a tool watch developed to meet the demanding standards of the Italian Navy. Luminor brought together a series of distinctive features that would become emblematic and instantly recognizable today. Conceived from necessity, embodying functional design principles with elements that maximized reliability and readability. Every feature served a purpose, a timepiece that didn't just mark time but defined Panerai's watchmaking tenet.

Luminor Marina

Case 44mm brushed steel
Calibre Automatic mechanical, 3 days power reserve
Functions hours, minutes, small seconds, date, stop seconds

Crown Protecting Device

Patented by Panerai in 1956, the crown protecting device was originally designed and engineered to ensure the case's water resistance. Today it has become a distinctive and emblematic symbol of the brand.

47mm
NEW

Luminor Tre Giorni

Case 47mm "patina" steel
Calibre Hand-wound mechanical,
 3 days power reserve
Functions hours, minutes
Water resistance 10 bar (~100 metres)

PAM01628

Luminor 3 Giorni

The Luminor 3 Giorni embodies the spirit of Panerai's storied past while embracing modern technicity. An homage to its historical roots and a hallmark of Panerai's heritage, a robust 47mm case is inspired by the watches worn by Italian commandos during their daring underwater missions, where the larger diameter enhances readability, a crucial feature for a tool watch.

44mm

Luminor Destro

Case 44mm polished steel
Calibre Hand-wound mechanical,
 8 days power reserve
Functions hours, minutes,
 small seconds
Water resistance 30 bar
 (~300 metres)

PAM01655

Luminor Destro

This watch finds its roots in Panerai's history when the Maison supplied the Italian Navy frogmen with essential navigational instruments on their left wrist, and a distinctive Panerai watch on the right. Fast forward to the present, the Luminor Destro Otto Giorni is a tool watch for today's Modern Heroes. This timepiece emerges as a modern homage to a storied tradition, merging the practicality needed for military precision with the elegance of contemporary watchmaking. Another key feature bridging the new and old is the crown protecting device with a downward lever, a hallmark of Panerai's commitment to combining comfort with practicality.

BiTempo

BiTempo, which means “two times” in Italian, relates to the GMT function. This function allows to read local time together with a second time zone on a single watch.

Luminor Quaranta BiTempo

Case 40mm brushed steel
Calibre Automatic mechanical, 3 days power reserve
Functions hours, minutes, small seconds, date, second time zone

PAM01111

Chronograph

Since 1943 with the first Mare Nostrum project, Panerai presented advanced mechanical instruments including chronograph, flyback, countdown and split seconds functions. A fascinating sport function to start, stop, reset and restart timing.

Chronograph

Long Power Reserve

Since early 1960s Panerai introduced 8 days power reserve calibre, to improve the practicality of use, reducing the mis-manipulation of the crown to be rewound only once per week, and to meet the strict requirements of the commandos of the Italian Navy. The long power reserve is one of Panerai's most distinctive.

44mm

Luminor Dieci Giorni GMT Ceramica

Case 44mm ceramic
Calibre Automatic mechanical, 10days power reserve
Functions hours, minutes, small seconds, date, GMT with AM-PM indication, 10 Days linear power reserve display
Water resistance 10 bar (~100 metres)

Submersible Elux LAB-ID

#PowerLightAtYourCommand

Panerai introduces a striking innovation in Mechanical Luminescence. Result of more than 8 years of Research & Development in our Manufacture in Neuchâtel, this bold timepiece is a showcase of innovation requiring 4 patents applications.

The core of the new Elux LAB-ID is the luminescence and visibility thanks to the Power Light function, fueled by a fully mechanical energy source. It can be activated on demand for a total length of 30 minutes. This function illuminates the indexes on the dial, the patented hands and the dot on the unidirectional rotating bezel. At 6 o'clock on the dial, the linear power reserve indicator shows the residual energy available for lighting up the watch. This timepiece is equipped with the automatic P.9010/EL calibre, made of 363 components with 6 barrels, of which 4 barrels are dedicated to store the energy required to ensure 30 minutes of on-demand Power Light function & 2 barrels are dedicated to ensure 3 days of time indication. The calibre is equipped with an ad-hoc microgenerator able to transform the mechanical energy stored in the 4 dedicated barrels into necessary electricity for the Power Light function.

The Elux LAB-ID PAM01800 is a limited-edition of 150 pieces, with an availability of 50 pieces per year over three years.

Moonphase

Luna, 'moon' in Italian, is associated to Panerai moon phase complication. Situated at 3 o'clock, it exhibits a rotating disc with a solid gold 24 carats moon. The moon phase function can be set easily from the watch crown without any tool.

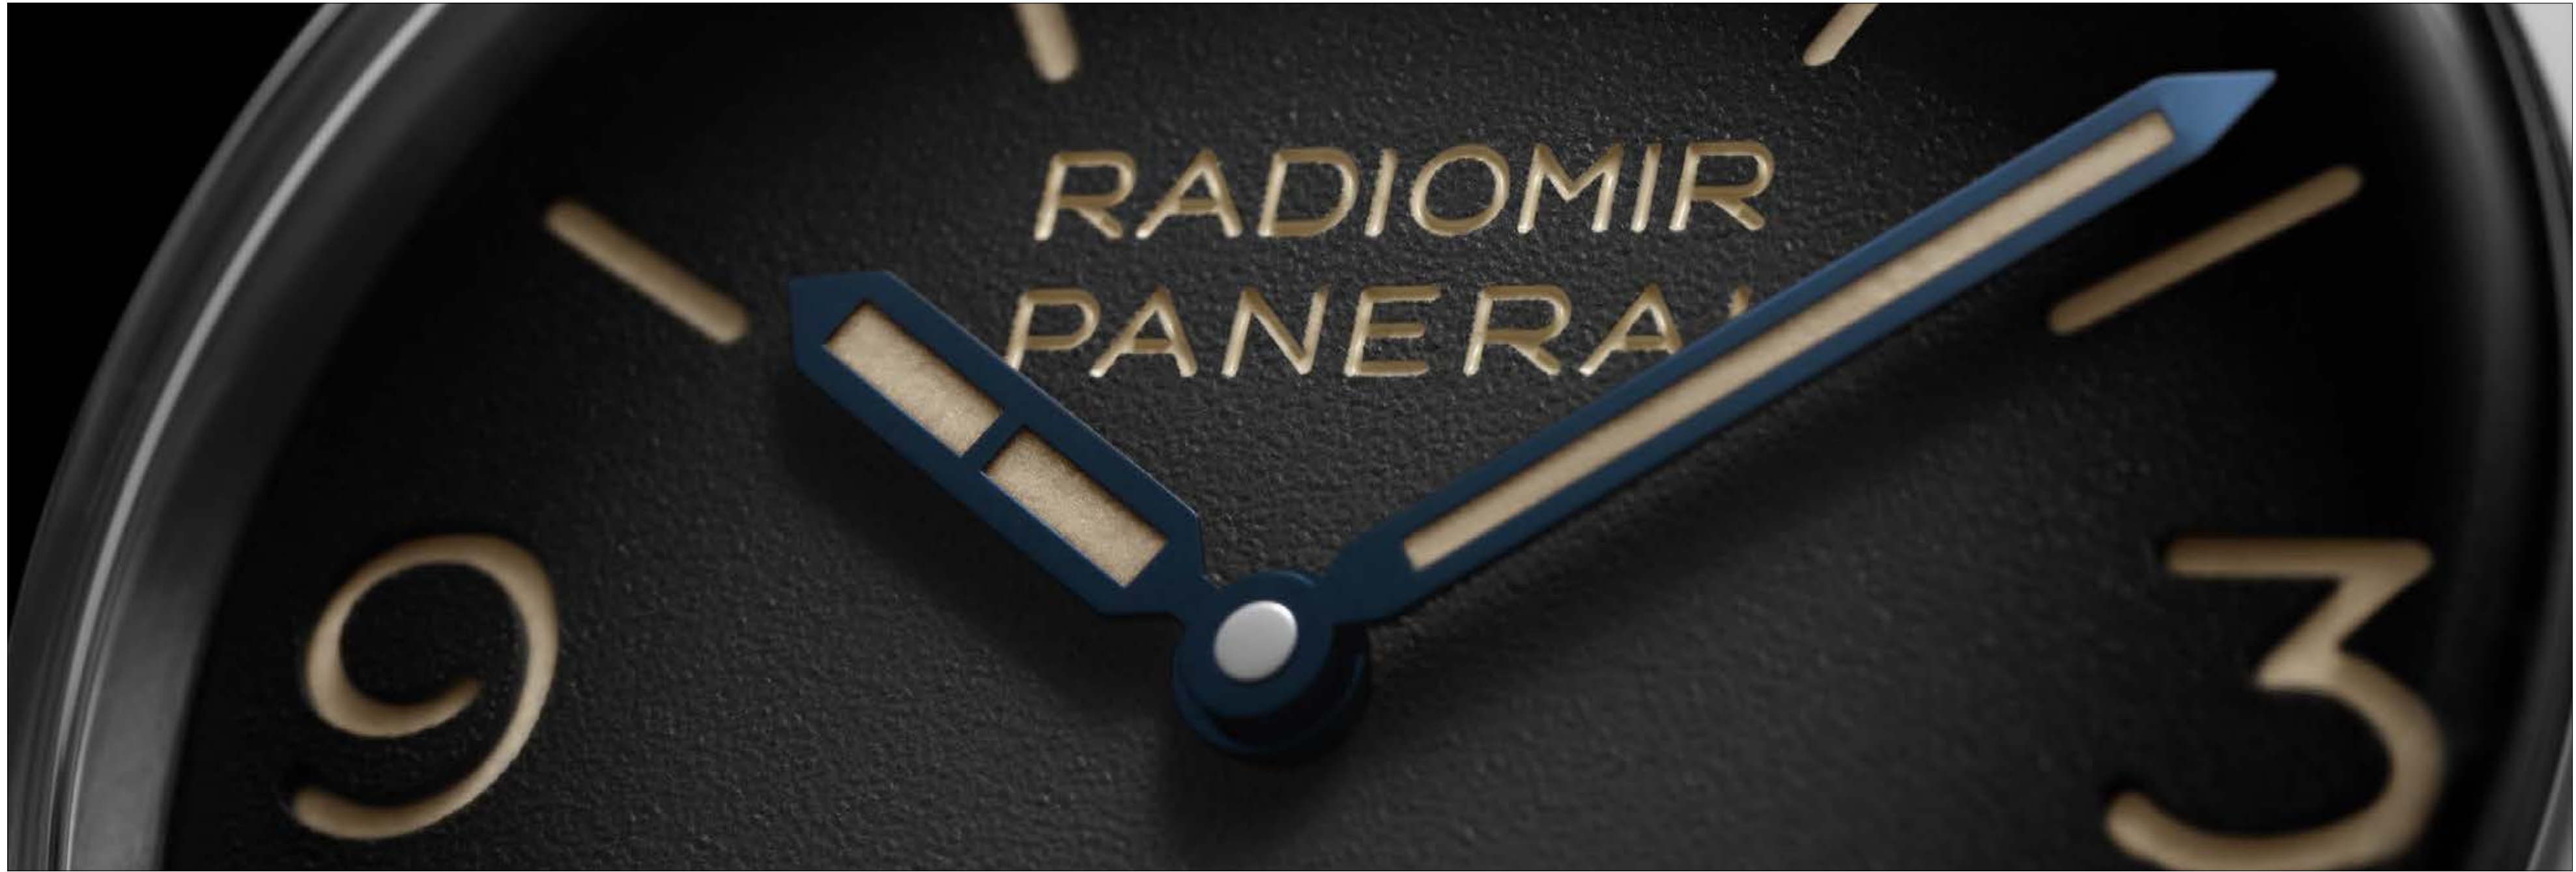

Luminor Due Luna

A close-up, high-angle shot of a Panerai Radiomir watch. The watch is positioned diagonally across the frame. The upper portion shows the dark blue dial with the iconic Panerai 'anse a filo' (filigree) pattern in a lighter blue. The middle section shows the polished metal case with its characteristic stepped design. The lower portion shows the watch resting on a dark blue, textured surface, possibly a piece of fabric or a book cover, with a light-colored, twisted rope visible in the bottom left corner.

Radiomir Collection

Radiomir
Homage to the history

Radiomir represents the beginning of the Panerai legend, being the first case developed back in 1935. The peculiar case design and the “anse a filo” illustrate the exemplary purity of Panerai design that has always fascinated enthusiasts of watchmaking all over the world.

Minute Repeater

One of the most complex complications created in the haute horlogerie, the Radiomir Minute Repeater Tourbillon GMT. This timepiece is the expression of the dual spirit of Panerai watches: the strong association with the history of the brand and the continuous search for the most advanced technical solutions.

Minute Repeater

Luna Rossa

Panerai & Luna Rossa

The partnership between Panerai and Luna Rossa started in 2019. Today for the 37th America's Cup, Panerai develops a collection of watches inspired by the technologies used in the race. The synergy between the two legends of the sea is a shared journey in pushing the limits of performance where innovation is at the heart of the challenge.

Submersible QuarantaQuattro Luna Rossa

A tribute to the unwavering spirit and commitment of the Luna Rossa Prada Pirelli sailing team towards the 37th America’s Cup, celebrating the aesthetic of the AC75 boat. Only 137 pieces.
