ISTRUZIONI/INSTRUCTIONS

Caro cliente,
ci congratuliamo con Lei per l'acquisto dell'orologio Panerai Radiomir Egiziano.
In questo libretto troverà le istruzioni per l'uso nonché tutti i dettagli circa la
manutenzione. Qualora avesse necessità di ulteriori informazioni, non esiti a
contattarci al seguente numero telefonico: +39 02 363138 oppure alla seguente
casella di posta elettronica: officinepanerai@panerai.com

Dear client,
we congratulate you on the purchase of the Panerai Radiomir Egiziano watch.
In this booklet you will find the instructions for use as well as all the information
about servicing your watch. Should you have any need for further information, do
not hesitate to contact us by telephone on the following number: +39 02 363138
or by e-mail at the following address: officinepanerai@panerai.com

NOME/NAME

INDIRIZZO/ ADDRESS

The Panerai boutique in Florence in the early 1900s.

OFFICINE PANERAI THE HISTORY

Since 1860, the company Guido Panerai & Figlio, suppliers to the Royal Italian Navy, had been producing instruments of high precision and technological sophistication. As a result, the name of Panerai has become indissolubly linked with the marine environment, the measurement of time and space, and the development of an elevated standard of quality and reliability, a fundamental requirement of the equipment supplied to the military.

Panerai began to produce watches in 1938 with the Radiomir. This watch made history through the heroic exploits of the commandos of the Italian Navy who wore it on their wrists.

The Panerai Luminor quickly became a military legend, both on account of its reliability and the originality of its design, and also because the total of a few hundred units produced by Panerai became, together with the first Radiomirs, rarities highly sought after by collectors.

In 1993 Officine Panerai offered its watches for the first time on the international market, and the Luminor and Radiomir models rapidly became the unquestioned leaders in the high quality sports watch sector.

Executed through its own manufacture, today's ranges consist of technologically avant-garde, extremely reliable products. These are watches which share the same criteria of craftsmanship as ever and they are tested to meet ever more demanding requirements.

Panerai watches are distributed through a highly selective international network of watch specialists as well as through the Panerai boutiques. The addresses are available on our website www.panerai.com.

THE PANERAI RADIOMIR EGIZIANO WATCH

Officine Panerai brings back to life a legendary model from its history in a special limited edition of just 500 units: the Egiziano (*Egyptian*), a model developed by the Florentine company in the second half of the 1950s and supplied to the underwater raid units of the Egyptian Navy in response to its request for an “indestructible watch”. A model originally produced in just a few dozen units and currently almost unobtainable on the vintage watch market. The new Radiomir Egiziano has the same aesthetic impact and is powered by an exclusive in-house movement with features faithfully following those of its progenitor.

THE CASE

The round case, which measures 60 mm in diameter, links up with large rounded lugs and is made in brushed titanium: this has allowed for a remarkable reduction in the total weight of its powerful body.

In addition to its distinctive levered bridge device to protect the crown, also in brushed titanium – the case features a wide, convex, bi-directional rotating bezel with embossed index markers, like the original Fifties model. The main index markers are positioned at each of the four cardinal points, with one formed by a transparent, luminous cap, while the others bear the numerical index markers 15, 30 and 45 in red. A knurled rim facilitates rotation, and the bezel encloses a Plexiglas® crystal.

Its full back plate, attached by six screws like the original, is engraved with the inscription Officine Panerai Firenze and a “pig” – as the human torpedo deployed in the exploits of the Italian underwater raiding units during the Second World War was known – as well as the identification number of the case, the sequential individual number, the size of the watch’s annual production, the material and the maximum depth at which the watch may be worn.

The water-resistance of your watch is guaranteed to a pressure of 10 bar which correspond to the hydrostatic pressure exerted by a column of water on 1 square centimetre at a depth of 100 metres under normal conditions. In these circumstances your watch is therefore water-resistant to a depth of about 100 metres.

THE CRYSTAL

Conforming to the historic models, the crystal of the Panerai Radiomir Egiziano is made of acrylic PMMA or Plexiglas®, a material with excellent resistance to water and UV rays.

NOTE: because of the delicacy of this material, a second crystal is supplied with the watch which will, if necessary, be replaced once free of charge on presenting it at any Authorised Panerai Supplier throughout the world.

It can be damaged by insecticides, sun creams and solvents.

THE DIAL

The dial is in the more classic Officine Panerai style: a black sandwich dial with Arabic numbers and hour markers perforated into the upper plate, while the lower plate is coated with an ecru colour luminous material – Radiomir in the original, as was written on the dial – as are the hands. The small seconds dial is located at 9.00, like the historical model. On the other side, at 3.00, is a subdial identical to that in the vintage models, containing both a reference to the power reserve duration as well as a reference to the patent obtained by Officine Panerai for its innovative crown protection device.

THE LEATHER STRAP

The watch comes with a leather strap, stitched to a large trapezoidal buckle, also in brushed titanium and personalised with the engraved inscription GPF (Giovanni Panerai & Figli – the same inscription used at the time). An extra leather strap is also included, of the same dimensions as the original.

THE MOVEMENT

THE MOVEMENT

Hand-wound mechanical, Panerai calibre P.2002/7, completely created by Panerai, diameter 13¾ lignes (31mm), thickness 6.6 mm, 21 jewels, power reserve 8 days, 3 spring barrels in series, Glucydur® balance, 28,800 vibrations/hour (equivalent to 4 Hz), KIF Parechoc® anti-shock device, 191 components.

Officine Panerai is not the owner of the Trademarks Glucydur®, KIF Parechoc® and Plexiglas®.

INSTRUCTIONS FOR USE PANERAI RADIOMIR EGIZIANO

WINDING THE WATCH

1. Raise the lever of the device protecting the winding crown **(A)** and, keeping the winding crown **(B)** in the initial position, that is, without pulling it out **(position 0)**, turn it clockwise. Turn the crown around 10 times for each day of power reserve.
2. Close the lever of the device protecting the winding crown **(A)**.

SETTING THE TIME

1. Raise the lever of the device protecting the winding crown **(A)** and pull out the winding crown **(B)** to the second click **(position 2)**.
2. Set the correct time.
3. Push back the winding crown **(B)** to the initial position **(0)** and close the lever of the device protecting the winding crown **(A)** again.

For a rapid change of the time, start from **position 1**. In this position the hour hand **(C)** moves in steps of one hour.

MAINTENANCE ADVICE

Panerai watches are made to very high standards of quality. It is worth remembering that the mechanical parts run 24 hours a day when used, so the watch must undergo regular maintenance to ensure long life and good operation.

WATER-RESISTANCE

Have your watch checked periodically for water-resistance by an Authorized Panerai Service Centre and restore it every two years with regular servicing, or whenever the watch has to be opened. The restoration of water-resistance necessarily involves replacing the seals so as to ensure the maximum water-resistance and security. Where the watch is used in underwater sports activities, it is recommended that it should be checked every year before the underwater activities begin.

THE MOVEMENT

Have the movement of your watch checked periodically by an Authorized Panerai Service Centre so as to preserve its perfect operation.

If the watch has a tendency to gain or lose time to a significant degree, the movement may need to be overhauled.

The movements are designed to withstand temperature variations between -10°C and +60°C (14°F and 140°F). Outside this range of temperatures, operational variations exceeding those set out in the specifications of the movement may be noticed. In addition, there is a risk that the lubricants contained in the movement may deteriorate, resulting in damage to some of its parts.

CLEANING THE EXTERIOR

To keep the exterior in perfect condition, we recommend washing your Panerai watch with soap and warm water, using a soft brush. After this operation, and also after bathing in the sea or a swimming pool, carefully rinse the watch with clean water. All Panerai watches can be polished with a soft, dry cloth.

THE STRAP

Panerai straps must be washed in warm water and left to dry. It is important not to dry them on a hot surface or exposed to direct sunlight, because the rapid evaporation of the water could damage their shape and quality.

After each bathe in the sea or a swimming pool, carefully rinse the strap with clean water.

To replace the strap, it is recommended that you should go to an Authorized Retailer or a Panerai Service Centre. In this way the inconvenience caused by incorrect replacement can be avoided.

Only an Authorized Retailer or Panerai Service Centre can guarantee the use of genuine Panerai straps, properly designed to fit the dimensions of the case and manufactured according to the quality standards of the brand.

ATTENTION:

Do not use the watch at a depth greater than that indicated.

The presentation case of your Panerai Radiomir Egiziano contains:

- Instruction booklet
- Certificates booklet
- Numbered edition certificate
- Illustrated book dedicated to the watch
- Second interchangeable strap
- Second crystal
- Steel screwdriver

PANERAI AFTER-SALES SERVICE

In order to maintain the superior quality of its watches throughout their life, Panerai offers four different kinds of service:

- COMPLETE SERVICE
- MAINTENANCE SERVICE
 - WITH POLISHING
 - WITHOUT POLISHING
- CHECKING AND ADJUSTING THE RUNNING OF THE WATCH
- EXTERNAL OPERATIONS

COMPLETE SERVICE

- Diagnosis of the movement
 - *Checking the appearance and state of cleanliness*
 - *Checking the average rate*
 - *Checking the functions*
- Checking the dial and the hands
- Checking the case, the bracelet or strap, the crystal and the anti-reflective coating
- Dismantling the movement by hand
- If necessary, changing any defective parts of the movement
- Cleaning the parts of the movement
- Reassembling and oiling the movement by hand
- Reassembling the dial and hands, checking the positioning and the parallelism of the whole
- Polishing and ultrasonic cleaning of the case and metal bracelet (if any)
- Replacing the seals

- Recasing the movement
- Checking the water-resistance of the watch at the maximum stated depth +25%
- Demagnetisation
- Attaching the bracelet or strap
- Checking the overall appearance of the product
- Checking the running, the power reserve and the functions of the movement (the number of days of testing depending on the power reserve)

MAINTENANCE SERVICE

- Diagnosis of the movement
 - *Checking the appearance and state of cleanliness*
 - *Checking the average rate*
 - *Checking the functions*
- Checking the operation of the movement
- Checking the dial and the hands
- Checking the case, the bracelet or strap, the crystal and the anti-reflective coating
- Ultrasonic cleaning of the case and metal bracelet (if any)
- Replacing the seals
- Checking the water-resistance of the watch at the maximum stated depth +25%
- Demagnetisation
- Attaching the bracelet or strap
- Checking the overall appearance of the product
- Checking the running, the power reserve and the functions of the movement (the number of days of testing depending on the power reserve)

POLISHING (ON REQUEST)

This is carried out with the Maintenance Service

- Removing/replacing the case
- Polishing and cleaning the case, the buckle and the metal bracelet (if any)

CHECKING AND ADJUSTING THE RATE

- Demagnetisation
- Adjusting the operation of the movement
- Changing the seal of the back
- Checking the water-resistance of the watch at the maximum stated depth +25%
- Checking the running and the functions of the movement

EXTERNAL OPERATIONS

For any operation not specified above (for example, operations involving the bracelet or strap, the buckle, changing the rotating bezel etc.), please contact a Panerai After-Sales Service Centre directly with your individual requirements.

Officine Panerai reserves the right at any time and without notice to modify the list of services offered and/or their content.
